Claims 1-75. (cancelled)

Claim 76. (new) A method for administering feed materials to a horse or dog, comprising:

- (a) providing a multiple-sectioned unitary package, the package comprising a plurality of package sections;
- (b) adding to one or more package sections one or more edible feed materials that have been selected for a specified horse or dog,
 - the one or more package sections containing the one or more feed materials in an amount of within about 15 weight percent or less of a specified amount,
 - the one or more feeds materials chosen from among one or more of feed, vitamins, minerals, chemical entities, electrolytes, proteins, and herbs;
- (c) administering the feed materials of the package to the horse or dog.

Claim 77. (new) The method of claim 76 wherein the plurality of package sections contain distinct feed materials.

Claim 78. (new) The method of claim 76 wherein at least one package section contains a vitamin, at least one package section contains a mineral, and at least one package section contains a protein supplement.

Claim 79. (new) The method of claim 76 wherein the package sections are filled with an amount of feed material that corresponds to a specified horse or dog.

Claim 80. (new) The method of claim 76 wherein the package sections are filled with distinct feed materials that have been previously selected for a specified horse or dog.

Claim 81. (new) The method of claim 76 wherein the package materials are filled with feed materials to within about 10 weight percent or less of a specified amount.

Claim 82. (new) The method of claim 76 wherein the package materials are filled with feed materials to within about 5 weight percent or less of a specified amount.

Claim 83. (new) The method of claim 76 wherein the package contains two sections.

Claim 84. (new) The method of claim 76 wherein the package contains three sections.

Claim 85. (new) The method of claim 76 wherein the package contains four sections.

Claim 86. (new) The method of claim 76 wherein the package contains five sections.

Claim 87. (new) The method of claim 76 wherein the package contains six sections.

Claim 88. (new) The method of claim 76 wherein the package sections are sealed prior to opening the package to administer the feed materials.

Claim 89. (new) The method of claim 87 wherein the package sections are sealed from moisture or external atmosphere.

Claim 90. (new) The method of claim 76 wherein the one or more feeds materials chosen from among one or more of vitamins, minerals, chemical entities, electrolytes, proteins, and herbs.

Claim 91. (new) The method of claim 76 wherein the package is constructed from a flexible material.

Claim 92. (new) The method of claim 76 wherein the package is rigid.

Claim 93. (new) The method of claim 76 wherein the package body is rigid and has a top member.

Claim 94. (new) The method of claim 76 wherein the feed materials are administered to a horse.

Claim 95. (new) The method of claim 76 wherein the feed materials are administered to a dog.

Claim 96. (new) A method for administering feed materials to a horse or dog, comprising:

(a) providing a multiple-sectioned unitary package comprising a polymer material of construction,

the package comprising a plurality of package sections each containing one or more edible feed materials chosen from among one or more of feed, vitamins, minerals, chemical entities, electrolytes, proteins, and herbs;

the plurality of package sections containing the one or more feed materials in an amount of within about 15 weight percent or less of a specified amount

(c) administering the feed materials of the package to the horse or dog.

Claim 97. (new) The method of claim 96 wherein the plurality of package sections contain distinct feed materials.

Claim 98. (new) The method of claim 96 wherein at least one package section contains a vitamin, at least one package section contains a mineral, and at least one package section contains a protein supplement.

Claim 99. (new) The method of claim 96 wherein the package sections are filled with an amount of feed material that corresponds to a specified horse or dog.

Claim 100. (new) The method of claim 96 wherein the package sections are filled with distinct feed materials that have been previously selected for a specified horse or dog.

Claim 101. (new) The method of claim 96 wherein the package materials are filled with feed materials to within about 10 weight percent or less of a specified amount.

Claim 102. (new) The method of claim 96 wherein the package materials are filled with feed materials to within about 5 weight percent or less of a specified amount.

Claim 103. (new) The method of claim 96 wherein the package contains two sections.

Claim 104. (new) The method of claim 96 wherein the package contains three sections.

Claim 105. (new) The method of claim 96 wherein the package contains four sections.

Claim 106. (new) The method of claim 96 wherein the package contains five sections.

Claim 107. (new) The method of claim 96 wherein the package contains six sections.

Claim 108. (new) The method of claim 96 wherein the package sections are sealed prior to opening the package to administer the feed materials.

Claim 109. (new) The method of claim 108 wherein the package sections are sealed from moisture or external atmosphere.

Claim 110. (new) The method of claim 96 wherein the one or more feeds materials chosen from among one or more of vitamins, minerals, chemical entities, electrolytes, proteins, and herbs.

Claim 111. (new) The method of claim 96 wherein the package is constructed from a flexible material.

Claim 112. (new) The method of claim 96 wherein the package is rigid.

Claim 113. (new) The method of claim 96 wherein the package body is rigid and has a top member.

Claim 114. (new) The method of claim 96 wherein the feed materials are administered to a horse.

Claim 115. (new) The method of claim 96 wherein the feed materials are administered to a dog.

Claim 116. (new) A method for administering feed materials to a horse or dog, comprising:

(a) providing a multiple-sectioned unitary package comprising a polymer material of construction,

the package comprising a plurality of package sections each containing one or more edible feed materials chosen from among one or more of feed, vitamins, minerals, chemical entities, electrolytes, proteins, and herbs;

the plurality of package sections comprising distinct feed materials;

(b) administering the feed materials of the package to the horse or dog.

Claim 117. (new) The method of claim 116 wherein the package sections are filled with distinct feed materials that have been previously selected for a specified horse or dog.

Claim 118. (new) The method of claim 116 wherein the package materials are filled with feed materials to within about 10 weight percent or less of a specified amount.

Claim 118. (new) The method of claim 116 wherein the package contains three sections.

Claim 119. (new) The method of claim 116 wherein the package contains four sections.

Claim 120. (new) The method of claim 116 wherein the package contains five sections.

Claim 118. (new) The method of claim 116 wherein the package contains six sections.

Claim 120. (new) The method of claim 116 wherein the package sections are sealed prior to opening the package to administer the feed materials.

Claim 121. (new) The method of claim 121 wherein the package sections are sealed from moisture or external atmosphere.

Claim 122. (new) The method of claim 116 wherein the one or more feeds materials chosen from among one or more of feed, vitamins, minerals, chemical entities, electrolytes, proteins, and herbs.

Claim 123. (new) The method of claim 116 wherein the package is constructed from a flexible material.

Claim 124. (new) The method of claim 116 wherein the package is rigid.

Claim 125. (new) The method of claim 116 wherein the package body is rigid and has a top member.

Claim 126. (new) The method of claim 116 wherein the feed materials are administered to a horse.

Claim 127. (new) The method of claim 116 wherein the feed materials are administered to a dog.
